

**Accordion Shutters**

**Measuring Instructions:**

1. Measure opening width "inside opening"
  2. Measure opening height "inside opening"
  3. Add 8" to the height for proper fit
  4. Download the Accordion Stacking chart to determine shutter width.
  5. **Place finished size measurements for width and height on order.**
- See stacking chart to ensure you have enough room on both sides of your opening.
  - Measure **Doors** from floor up to top of opening. Note any projections of sill, door knobs or keystones that project outwards.
  - You must have 4" above and below window openings for proper fit.
  - You must have 4" above Door for proper fit.

(Always measure width by height)

**Windows:**

**How to get shutter size.**

Measure your outside opening width by height.

**W x H = 53" x 51"**

Example:

Finish Size  
53x51

**Shutter Finished Size**  
**62.75"W x 59"H**

**Doors:**

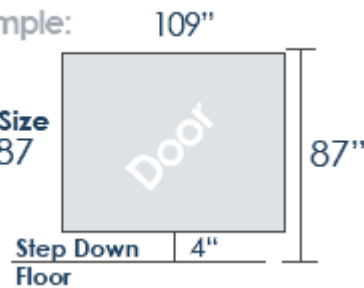

**How to get shutter size & square footage.**

Measure your outside opening width by height.

**W x H = 109" x 83"**

Example:

Finish Size  
109x87

**Note:** When the opening has stucco bands around them you must take that into consideration when determining the square footage being sold. You may need to add to the shutter size to go beyond the bands.
